## Overview

### Document Scope

This document will outline the basic functionality of the new John R Turk Electrical Supplies e-commerce site. This site opens up several key functionalities to enhance your trading experience with Turks and allowing for true self service over the internet.

Your user name and password details are included in the email that this document was delivered with, use these to login to <https://shop.jrt.com.au> and begin online shopping today.

Below you will find several sections that will outline each of the major areas of functionality on the site, how to use them and some tips and tricks to ensure that you get the best experience possible from the site.

# John R. Turk USER DOCUMENTATION

## Homepage

When you login to the Turks online shop, you are going to be greeted with a lot of empty boxes, to show you how these will develop with use over time, let's examine a screen that has been used for some time below.

The screenshot shows the John R. Turk online shop homepage. The header features the John R. Turk logo and a turkey mascot. The navigation bar includes links for HOME, STORE, my cart, my quotes, my orders, my account, and quick order. A welcome message for 'jrt test' is displayed. The main content area is divided into several sections:

- SEARCH PRODUCTS:** A search bar with a 'GO' button. A callout box points to the search bar with the text 'The search box.'
- MY SAVED LISTS:** A section for saved lists. A callout box points to the 'Create saved lists for later use' text.
- WELCOME TO JOHN R TURK:** A banner image of a woman holding a product.
- MY TOP 20 PRODUCTS:** A list of the top 20 most purchased products. A callout box points to this list with the text 'A top 20 list constantly keeps track of your 20 most purchased products.'
- Quick order link:** A link to the quick order page.

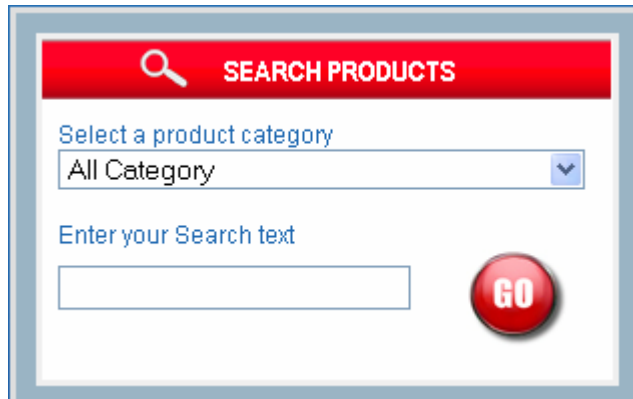

The footer contains the text: 'Powered by Mule. MuleSource is Open for Integration. © 2003 Rexel Group Australia LTD. Terms and Conditions | Contact Us | Help'.

Let's examine these page elements in detail to examine what each page element does.

## Search Box

This is where the search experience begins, by using either a keyword search or a combination of the keyword and category dropdown menus, you can search for product here. Turks has developed a state of the art parametric search engine to ensure that your search experience is the best in the industry (more on what that means later!).

A search interface with a red header bar containing a magnifying glass icon and the text 'SEARCH PRODUCTS'. Below the header is a dropdown menu labeled 'Select a product category' with 'All Category' selected. Underneath is a text input field labeled 'Enter your Search text'. To the right of the input field is a red circular button with the word 'GO' in white.

## Quick Order Link

For those who already know their part numbers, you can open this form and simply key in a quick order. These part numbers are then validated to ensure that they are correct and added to the shopping cart.

[Take me to QUICK ORDER now > > >](#)

## The Top 20 List

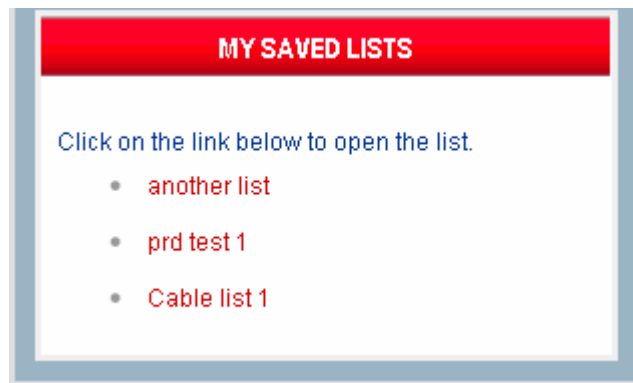

One of the most common trends seen in the wholesaling industry, is that most user's top 80% of sales will come from only about 20 products. In recognizing this, Turks have developed the top 20 list, a list that dynamically tracks products ordered over the web and always shows you your current top 20 products. This list will appear blank when you first visit the store but don't worry, as you shop with us you will see products appearing and changing order in here - in real time.

A section titled 'MY TOP 20 PRODUCTS' in a blue header. Below the header, there is a product listing for 'HPM769M MECHS WHITE'. To the left of the text is a small image of a yellow and white mechanical part. Below the image is a link that says 'click to enlarge'. To the right of the product name, it says 'UOM: each' and 'Item Price: \$36.63'. Further right is a quantity input field labeled 'qty' with the value '0'.

## Saved Lists

---

Do you have a set of products that you always order together? A particular configuration for a number of different house lots for example? Simply add all these products to a shopping cart and select the 'save for later' option to generate your saved list. These lists can then be recalled and dropped into a shopping cart with ease.

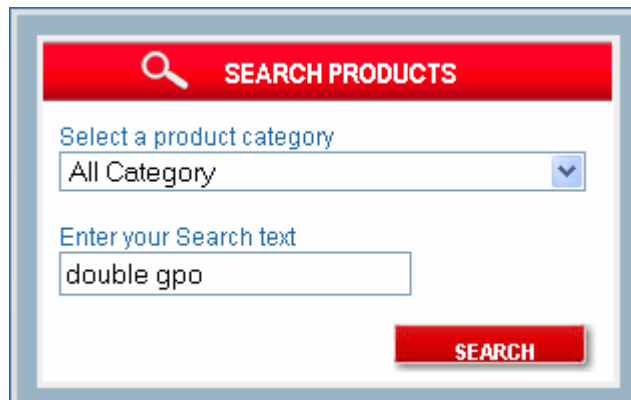

Let's look at some of these features in depth now.

## Search and Order Functionality

### Search Engine

Turks have developed the latest in search engines to enable easy, efficient finding of the product you're looking for. We have created a search experience using Parametric Search Techniques that allow you to filter in and out of datasets with ease. Quite simply, a Parametric Search is defined as 'a search done that fits a number of simultaneous criteria', for example a description, part number and supplier name. However, Turks have further enhanced this concept with the development and deployment of attribute driven data to the web engines, this allows for unique grouping of products based on their product attributes, for example 2000 series switchgear, with added neon and in black. Let's take a look at this in action below.

#### Step 1: Enter your search criteria

The screenshot shows a web form titled "SEARCH PRODUCTS" with a magnifying glass icon. It contains a dropdown menu for "Select a product category" with "All Category" selected, a text input field for "Enter your Search text" containing "double gpo", and a red "SEARCH" button.

UOM: each Pack qty: 10 LOW STOCK qty 1 **add to cart**

Shown on the left, we see the product refinements, or facets. It's these product facets that allow a user to drill deeply into the search index for accuracy and control. Shown here, we see that we can facet by 'Product Category' and 'Brand' for example. There are several hundred facets defined for the Turks search engine, see the following screenshot for what happens when the user scrolls down this page.

## Nominal current

- 10.0 A (19)
- 15.0 A (4)
- 32.0 A (2)
- 5.0 A (1)

## Nominal current socket outlet

- 10.0 A (340)

- 4000 Series Saturn (17)
- SL2000 Series (9)
- Metal Plate range (Clipsal) (6)
- 439 Series (3)

# John R. Turk USER DOCUMENTATION

Shown here, we see the real power of the faceted search. The user can drill into these values to get the number of results shown in the brackets beside each facet name. For example, the user will now drill into double gpo with Number of Socket Outlets = 2 (224 results) and SC2000 series (6 results) for the result shown below.

The screenshot displays the John R. Turk website's search results page. The header features the John R. Turk logo and the tagline "FOR SERVICE AND PRICE. IN BUSINESS FOR YOUR BUSINESS." Below the header is a navigation bar with links for HOME, STORE, my cart, my quotes, my orders, my account, and quick order. A welcome message "welcome back jrt test | logout" is visible on the right. The main content area is divided into two columns. The left column contains a "SEARCH PRODUCTS" section with a dropdown menu set to "All Category" and a search input field containing "double gpo". Below this is a "REFINE YOUR SEARCH" section with various facets: Applied Facets (2.0, SC2000 Series, Remove All), Product Category (Socket Outlet/Switch Combination (6)), Brand (CLIPSAL (6)), Colour (Black (2), White (2), Chrome Shadow (1), Cream (1)), Cover (Full cover plate (6)), Earth leakage switch (None (6)), and Method of operation (Switch Rocker Button (6)). The right column displays "SEARCH RESULTS: All Category > double gpo" with a list of five products. Each product entry includes an image, a "click to enlarge" link, the product name (CLISC2025XBK, CLISC2025XWE, CLISC2025WE, CLISC2025BK, CLISC20253S), item price, a description, and an "add to cart" button. The "add to cart" buttons show the quantity (1) and the stock status (LOW STOCK or IN STOCK).

Can't find what you are looking for? [Click here](#) Powered by MUI: MultiSource is Open for Integration © 2003 Rexel Group Australia LTD | [Terms and Conditions](#) | [Contact Us](#) | [Help](#)

Again, the user can continue to drill down into the search by selecting more facets, or the user can travel up the search index by clicking on the X character next to any facet – you do not have to remove search filters in the same order as they were applied, the search indexes will keep up with this!

This is the power of Parametric search, the only way to get familiar with this however is to try it on for yourself, so go ahead – login to your account and experience it for yourself.

## Search Tips for Power Users

The Turks search engine is a fully featured, best of breed machine. This means that all the powerful modern search features are there. One feature that we will touch on in this documentation is the use of Boolean search operators. Those users familiar with power searching on the internet will be familiar with this concept. Say I want to search for “cable ties that were black but not from Panduit” as a text representation. The corresponding Turks web search would be ‘cable tie && black && !panduit’.

The screenshot shows a search interface with a red header bar containing a magnifying glass icon and the text "SEARCH PRODUCTS". Below the header, there is a dropdown menu labeled "Select a product category" with "All Category" selected. Underneath, there is a text input field labeled "Enter your Search text" containing the search query "cable tie && black && !panduit". A red "SEARCH" button is located at the bottom right of the form.

Shown here, we see several page elements combined in the shopping cart. Let's talk a little more in depth about each of these below.

## My Shopping Cart

---

This is your shopping cart, items that have been added from either saved lists, searches or top 20 lists are in here. The shopping cart shows the part number, the item unit price and the line total. Also showing are pack quantities and available stock in your local branch. You can change quantities here, then clicking the 'update total' button will recalculate the cart. You can also remove items from the shopping cart by clicking on the  icon in the shopping cart lines.

[SAVE FOR LATER](#)[REQUEST QUOTE](#)[CHECKOUT](#)

These three buttons will let you confirm your shopping cart as either a saved list (Save for Later), a quotation (Request Quote) or as an order (Checkout).

## Search Products

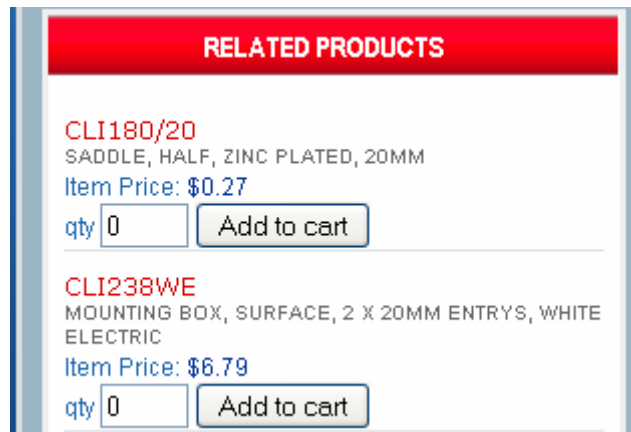

---

The search box is still available from the shopping cart and the user can continue to search and add products to the shopping cart by either entering search terms as described above.

## Related Products

---

Any related products to items appearing in the shopping cart will be shown in this box and the user can add these to the shopping cart by simply entering a quantity and clicking the 'Add to Cart' button.

A screenshot of the 'RELATED PRODUCTS' section. It has a red header with the text 'RELATED PRODUCTS' in white. Below the header, there are two product listings. The first listing is for 'CLI180/20', described as 'SADDLE, HALF, ZINC PLATED, 20MM', with an 'Item Price: \$0.27'. It includes a quantity input field with '0' and an 'Add to cart' button. The second listing is for 'CLI238WE', described as 'MOUNTING BOX, SURFACE, 2 X 20MM ENTRY'S, WHITE ELECTRIC', with an 'Item Price: \$6.79'. It also includes a quantity input field with '0' and an 'Add to cart' button.

RELATED PRODUCTS	
<b>CLI180/20</b> SADDLE, HALF, ZINC PLATED, 20MM Item Price: \$0.27	qty <input type="text" value="0"/> <input type="button" value="Add to cart"/>
<b>CLI238WE</b> MOUNTING BOX, SURFACE, 2 X 20MM ENTRY'S, WHITE ELECTRIC Item Price: \$6.79	qty <input type="text" value="0"/> <input type="button" value="Add to cart"/>

Once you're ready to check out your goods and place an order, simply click on the 'Checkout' button.

Items that you’ve checked out will now appear in your top 20 list of items and this order will now appear in the ‘My Orders’ section of the site. As with the search, the best way to get familiar with the functionality within these pages is to use them, so why not login and give placing an order online a go?

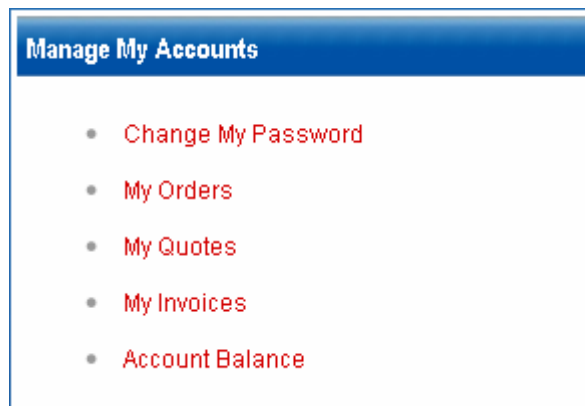

## My Account Features

### Overview

In addition to providing a self-service portal for order placement and product search, the Turks E-Commerce store also allows you to track several of your account functions with us. Including order tracking, invoice search and reprints, account balance enquiries and quote conversions, the Turks online store will allow you to track all interactions with Turks – not just those placed through the web.

The 'my account' link will take you directly into the account features available to the user, presented as shown below.

Each one of these features will enable you to interact with a different aspect of your relationship with Turks, let's look at each of these functions below.

### Change My Password

This feature will let you change both your username (if required) and password for logging into the site. **It is highly recommended that you change your password the first time that you login.** If you haven't done so already, why not login and try changing your password now? For security, your new password must have the following characteristics:

- Passwords must be at least 6 characters long
- Passwords must contain at least 1 numerical digit
- Passwords must contain at least 1 capital letter.

## My Quotes

This page will allow a user to track any open quotes currently outstanding with Turks, this includes both quotations created from the shopping cart or any quotation that has been entered by a Turks Branch against your account.

Please select your preferred date range

From:  To:  [Search](#)

**MY QUOTES**

Quote No:	Quote Name:	Date:	Expires:	Status:	Total:	Tax:	Ext. Total:
896261	quote name	04/12/2009	03/01/2010	Processed	\$54.28	\$5.43	\$59.71

[Click Quote No. to see Quote detail](#)

As with the orders page above, the My Quotes page will allow you to view and work with quotations both created in the branch and those created in the webstore. A user can drill into the detail of a quotation to process the quote into an order. The quote number is the link for a user to do this.

Click on the highlighted link to have an email copy of the invoice delivered to your inbox.

## Account Balance

Additionally, the Turks webstore will allow a user to check their current account balance. Clicking on the 'Account Balance' link from the My Accounts page will display your current balance with Turks. Users can refer to this page to track their outstanding amounts with Turks.

Account Balance Overview							
Current Balance	30 Days	60 Days	90 Days	120 Days	Total	Trading Terms	Credit Limit
\$24.42	\$0	\$0	\$0	\$0	\$24.42	30	\$2000

Please select your statement period :  [Get Statement](#)

## Statement Reprint (email PDF)

Using the date picker shown above, users can also select a statement period and have a copy of that statement emailed to their inbox. For example, if I wish to reprint an August 2009 statement, I simply select any date in August 2009, then click on the 'Get Statement' button, shown below.

Account Balance Overview							
Current Balance	30 Days	60 Days	90 Days	120 Days	Total	Trading Terms	Credit Limit
\$24.42	\$0	\$0	\$0	\$0	\$24.42	30	\$2000

Please select your statement period :  [Get Statement](#)

**August 2009**
